

Product Requirements Document (PRD)

Product Name

B2B Gift Voucher Ordering & Download Portal

1. Background & Context

Corporate clients increasingly require a **simple, secure, and scalable** way to purchase gift vouchers in bulk across multiple brands, make payments through wallet or bank transfer, and later download vouchers for distribution.

Current processes are often fragmented, manual, or error-prone. This PRD defines a **single, idiot-proof B2B web portal** that enables end-to-end voucher ordering and fulfillment with minimal operational dependency.

2. Goals & Objectives

Primary Goal

Enable logged-in corporate clients to:

- Place bulk gift voucher orders across multiple brands
 - Make payments via wallet or bank transfer
 - Securely download vouchers post payment verification
-

3. User Personas

Corporate Client (Primary User)

- Logged-in B2B user
- Finance / HR / Procurement role
- Needs speed, clarity, accuracy, and auditability

4. In-Scope Features

- Secure login & dashboard
- Brand discovery & configuration
- Cart-based bulk ordering
- Wallet & bank transfer payments
- Order tracking
- OTP-based secure voucher download
- Excel-based voucher delivery
- Order History
- Wallet txn history
- User management (Role based users)

5. End-to-End User Journeys
